Conduct of Evaluation

<p>Station Information</p>	<ul style="list-style-type: none"> -All stations shall be designed to assess integrated clinical/practical encounters. -Domains and sections may overlap, and more than one category can be evaluated within a station. -Each station may address one or more cases or scenarios. -SOE stations are designed with preset questions and ideal answers. -A scoring rubric for post-encounter questions is also set in advance (if applicable).
<p>Time Management</p>	<ul style="list-style-type: none"> -The examiner is aware of how much material needs to be covered per station, and it is their responsibility to manage the time accordingly. -The examiner will want to give you every opportunity to address all the questions within the station. -They may indicate that "in the interests of time, you will need to move to the next question." This type of comment has no bearing on your performance. It is simply an effort to ensure that you complete the station. If you are unclear about something during the station, ask the examiner to clarify. -Some stations may finish early – if this occurs, the examiner will end the encounter.
<p>Confidentiality</p>	<ul style="list-style-type: none"> -Electronic devices are NOT permitted. -Communication with other candidates during the evaluation is prohibited.
